Westfalia open shield excavator for pipejacking DN1600 with additional DN1100, DN1200, DN1400 & DN1800 size shields

For Sale & For Rent

Westfalia open shield excavator for pipejacking DN1600 with additional DN1100, DN1200, DN1400 & DN1800 size shields

We offer for sale or rent a very nice complete pipe jacking system with a Westfalia backactor/ excavator unit. The system is offered with electric train for transport in the muck skips in an out of the tunnel. There are rails for about 300 m included. It goes with a jacking frame and hydraulic cylinders. There is also the hydraulic power pack for operation of the main jacking frame including the remote control unit. There are shields for different diameters and currently the system is mounted in a DN1600 steel structure.

Shield DN100 - OD1330 mm / Shield DN1200 - OD1435 mm / Shield
DN1400 - OD1740 mm / DN1600 - OD1870 mm / DN1800 - 2100 mm

The system was used last time in November 2016. Before using it, it was completely overhauled and partially upgraded as this was required for the project at the nuclear power plant (strong safety regulations). The system is ready for immediate use and can be delivered out of stock.

We can offer the system for a competitive price of 95.000 Euro. It allows contractors to step into the business at low investment.
