Microtunneling bentonite stand-alone flow & pressure sensor skid, serviced and new with warranty

Bentonite flow & pressure sensor skid

Flowmeter and pressure sensor unit specially designed for bentonite mixtures for pipe lubrication in microtunneling projects. The system is equipped with a special high pressure flow meter and a membrane type pressure sensor. The components are built in to a robust steel frame for protection and handling.

There is a data cable to connect the system to the automatic bentonite lubrication system for visualisation of the measured data.

Designed for operating pressure
Size bentonite line for

0 - 100 bar
25 mm

New and serviced in stock.
