Microtunneling Rock Cutting Wheel for Herrenknecht AVN1500T Machine, fully serviced with warranty

We have available for immediate sale or rent a rock cutting wheel for the AVN1500T Herrenknecht Microtunneling machine.

This cutting wheel is fully serviced and equipped with new cutting tools.

This type of cutting head is for application in consolidated ground material, ground with stones and boulders and hard rock such as e.g. granite, basalt, granulite or gneiss.

The rock cutting wheel can be used in soil condition from UCS 150 Mpa to 450 Mpa dependent on the configuration.

In geology UCS stands for Unconfined Compressive Strength which is often used as a first guide to determine the type of cutting wheel needed.

Additional and more detailed soil analyses will be required for making the final decision.

If we do not have the required cutting wheel available, we can always offer a new build cutting wheel.

For Sale & For Rent
